

- * New quick simple to use handheld program
- * Accurate records while you work
- * One data entry screen
- * Plug into main pc - invoice in seconds

- ◆ Record any type of job.
- ◆ Use any description unit.
- ◆ All client contact details to hand.
- ◆ Quick and easy to add new clients and job types.
- ◆ Set up to six price bands for each job.
- ◆ Allocate a price band to each client. Overwrite price if required.
- ◆ Use any job description using area, length, numbers, time etc to calculate cost.
- ◆ Add comments for invoicing and traceability.
- ◆ Any number of Pocket Contractors can interface with main program.

Fieldman Pocket Contractor is designed for the busy contractor that needs to record each job as it is done. When the operator gets back to base all they have to do is 'drop' the Pocket Pc into the cradle connected to the desktop pc running Fieldman Contractor.

All the jobs recorded are then automatically transferred to the main program. Allowing invoice's to be generated in a couple of clicks, as no more data entry is required.

Professional invoices with your company logo and details are printed with VAT automatically calculated.

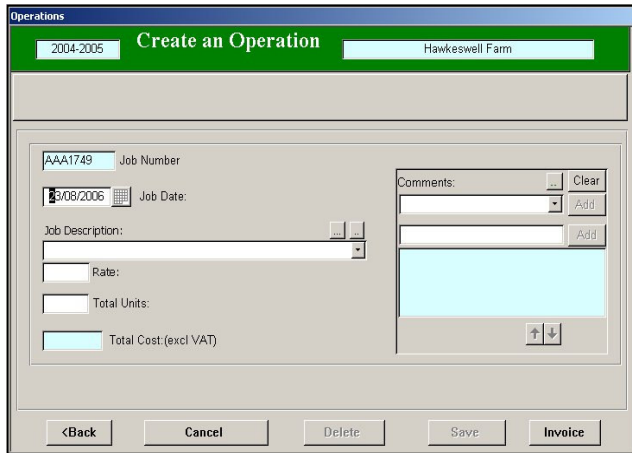

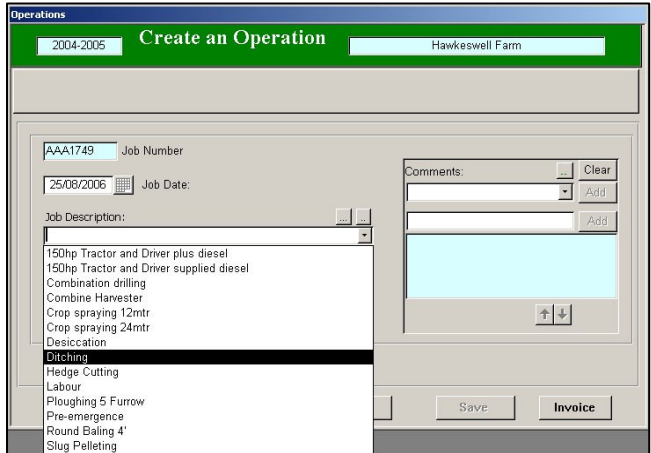

Fieldman Contractor Lite starts at £195 and will do all the jobs as described above. Can be easily up-graded to the full Spray Contractor program that records full pesticide traceability records.

Pocket Contractor is a £95.00 add-on and links to the main pc program for invoicing.

Pear Technology Contractor Lite Guide

Contractor Lite is designed to make job recording and invoicing very quick and easy. There are only two main data input forms. One to create the operation, the other for invoicing. The operation form is the same on the Pocket Pc allowing you to enter job details in the field.

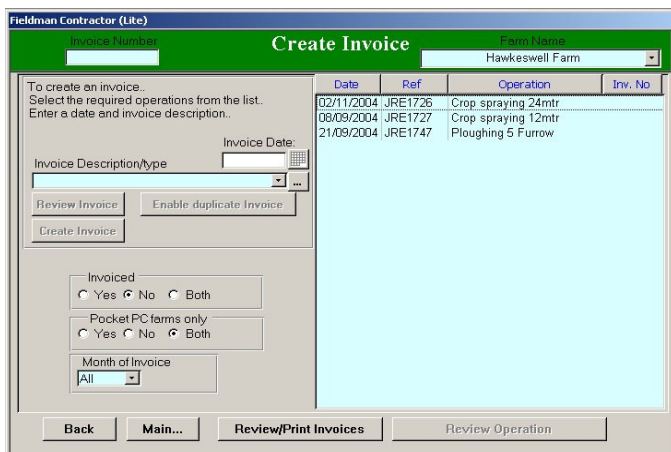

Create Operation form. Enter a date - click button to open the calendar or type the date in.

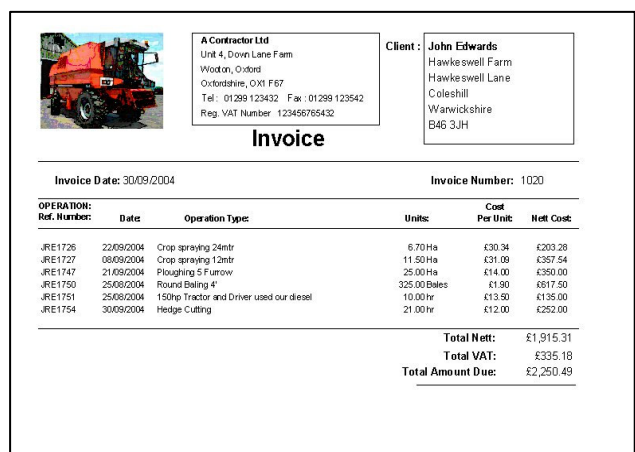

Select from Job Description list job type (use buttons to add new job descriptions, rates and units), enter rate, add a comment if required from list or type a free text comment in box below.

Pocket Contractor has the same form layout and functions, making it very quick and easy to record jobs when working on site. When the jobs have been entered into the Pocket PC it is only one click to transfer the data to the main Desktop Contractor program. One more click then creates the invoices.

Fieldman Contractor can handle any number of Pocket PC handholds. Contracting businesses with several can have a Pocket PC for each operator. Each Pocket PC will update the main program for records and invoicing.

Date	Ref	Operation	Inv. No
02/11/2004	JRE1726	Crop spraying 24mtr	
08/09/2004	JRE1727	Crop spraying 12mtr	
21/09/2004	JRE1747	Ploughing 5 Furrow

				Total Nett:	£1,915.31
				Total VAT:	£335.18
				Total Amount Due:	£2,250.49

Create Invoice. Select client from list. **Contractor Pro add on module** allows you to filter the list to show by selected month, and show only clients with jobs entered on the Pocket Pc.

When a client is selected, jobs not invoiced are listed. Select jobs required for invoicing (use Ctrl or Shift key and mouse) Select date, invoice description (identifies the invoice) and click Create Invoice.

Example invoice. You can add your own company logo.

Comments can be added to invoices allowing full traceability. Two invoice layouts are provided, standard or client address positioned for windowed envelopes.
